

**Program to enter the user name and password from the user, if it is correct then user is logged in else not.**

## **FORM**

A screenshot of a Windows application window titled "Form1". The window has a standard Windows title bar with minimize, maximize, and close buttons. The main area of the window has a light gray background with a fine grid pattern. There are three main components: a text box labeled "USER NAME" with a yellow highlight, a text box labeled "PASSWORD" with a yellow highlight, and a button labeled "SUBMIT" centered below the password field.

## **CODING**

```
Dim username As String
Dim password As Integer
Dim counter As Integer
Private Sub Command1_Click()
username = "Avneesh"
password = "9696"
Dim user, pass As String
user = Text1.Text
pass = Text2.Text
If username = user And password = pass Then
```

```
MsgBox ("you are logged in")
Else
MsgBox ("try again")
counter = counter + 1
End If
If counter = 3 Then
MsgBox ("your account is blocked")
Unload Me
End If
End Sub
```

## **AFTER EXECUTION**

A screenshot of a Windows application window titled "Form1". The window has a light gray background and contains four text boxes and one button. The first row has a text box labeled "USER NAME" containing the text "Avneesh". The second row has a text box labeled "PASSWORD" containing the text "####". Below these is a button labeled "SUBMIT".
