

## Program to check whether the student is pass or fail in the examination

```
#include<stdio.h>
#include<conio.h>
main()
{
    float per;
    printf("enter the persentage");
    scanf("%f",&per);
    if (per>80)
        printf ("grade a");
    else if (per<80&&per>70)
        printf ("grade b");
    else if (per<70&&per>60)
        printf("grade c");
    else if (per<60&&per>50)
        printf("grade d");
    else if (per<50)
        printf("fail");
    getch();
}
```
