**/*A program in Java to take two numbers as input from command line interface and display their sum*/**

```java
class Sum
{
        public void add (int a,int b)
        {
                return (a+b);
        }
}
class SumMain
{
        public static void main (String arg[])
        {
                Sum obj1 = new Sum();
                int x =0 ,y  = 0 ;
                String s1=arg[0];
                String s2=arg[1];
                 x = Integer.parseInt (s1);
                 y = Integer.parseInt (s2);
               System.out.prinln (obj1.add(x,y));
        }
}
```

Command Prompt

```
E:\>javac SumMain.java

E:\>java SumMain 1 2
3

E:\>_
```
