

Program to display the private type information.

FORM

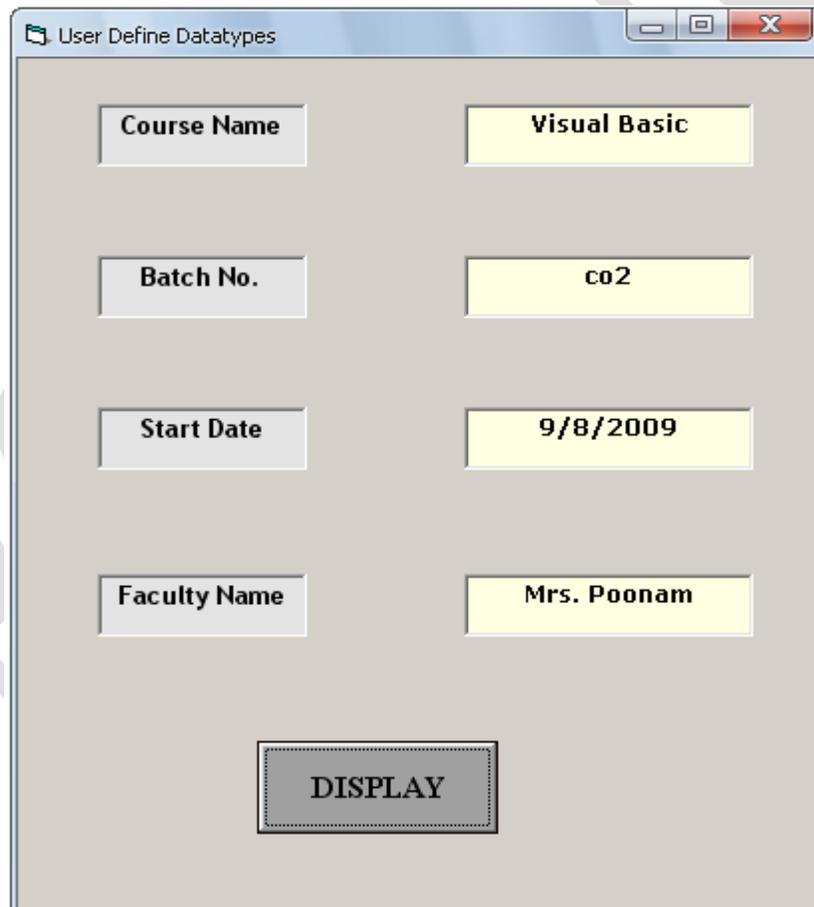

The image shows a Windows form window titled "User Define Datatypes". The form has a dotted grid background and contains four text boxes labeled "Course Name", "Batch No.", "Start Date", and "Faculty Name". A "DISPLAY" button is located at the bottom center of the form.

CODING

```
Private Type course_info  
coursename As String  
Batchno As String  
startdate As Date  
facultyname As String  
End Type  
Private Sub command1_click()  
Dim c As course_info
```

```
c.coursename = "Visual Basic"  
c.Batchno = "co2"  
c.startdate = "9-08-2009"  
c.facultyname = "Mrs. Poonam"  
Text1.Text = c.coursename  
Text2.Text = c.Batchno  
Text3.Text = c.startdate  
Text4.Text = c.facultyname
```

AFTER EXECUTION

The screenshot shows a window titled "User Define Datatypes" with a light gray background. It contains four rows of labels and values, and a "DISPLAY" button at the bottom. The labels are in gray boxes and the values are in yellow boxes.

Course Name	Visual Basic
Batch No.	co2
Start Date	9/8/2009
Faculty Name	Mrs. Poonam
